ALL4PACK 2018 TO HOST OVER 1350 EXHIBITORS AND BRANDS

MHWmagazine 5 days ago Pack Stack Rack and Roll, World

ALL4PACK Paris 2018 will take place in Paris Nord Villepinte (north of the French capital) from 26 to 29 November 2018. This year, the trade show will have exciting new features, including an enhanced programme of business meetings, a creative lounge, a start-up hub and an extremely diverse agenda covering ALL4PACK's four main sectors — packaging, printing, processing and logistics. Among the 1,350 exhibitors and brands, many British companies will be present alongside international participants.

ALL4PACK Paris, previously Emballage & Manutention, is the global market place for the packaging industry, including processing, printing and handling. In 2016, close to 89,000 visitors attended the event. This comforted the trade event as the premier platform for business deals, innovation and exchanges of ideas in the field of packaging, with about 1,500 exhibitors and represented companies. Over 500 business meetings were held in 2016 — a number which is set to increase thanks to this year's new Meetings Planner.

The trade show will be held from 26 to 29 November 2018 in Paris Villepinte, the exhibition centre located north of Paris (France). It will be organised in four key areas: Packaging, Printing, Processing and Logistics (handling). Many British exhibitors will be present alongside a wide range of international participants. Some of the UK-based companies attending the trade fair are featured below.

Aegg

Aegg is a packaging company specialising in the food-and-beverage sector. Its packaging products (plastics and glass) are found throughout major supermarkets and, increasingly, on aeroplanes (airline meals) and in foodservice outlets. All Aegg's packaging is manufactured at world-class, accredited production sites, in Europe and elsewhere across the globe.

During the trade show, Aegg will be launching several new product lines in food packaging, including a line of innovative, recyclable PP plastic sauce/soup pots available in double-serve (720ml) and single-serve (410ml) sizes; a new range of table-presentable, recyclable glassware food pots; and clear, freezable thin-walled PET food pots.

Avery Dennison

Avery Dennison is a leading manufacturer of self-adhesive materials. The company responds to the challenges of businesses in the food, retail and fulfilment markets. Its solutions are rooted in efficiency, cost savings, food safety and sustainability through intelligent innovations that solve

business problems and improve business processes.

The company will be presenting its ADTP2® EcoCut labelling solution for the first time at ALL4 PACK 2018. This innovative solution is the newest member of the Monarch® printer-solutions family. Besides, it is the first-to-market solution that allows users to choose the exact length and quantity of labels they need from one barcode printer, without cutting through a liner.

BST Detectable Products

BST Detectable Products has been pioneering the development of detectable plastic technology since 1985. The BST compound, XDETECT®, is arguably the most advanced detectable plastic compound currently available on the market. It is a polypropylene-based plastic, engineered to be metal detectable, X-ray visible, shatter-proof and antibacterial. The entire formulation is FDA-approved and fully compliant with EU and Japanese migration testing standards. BST Detectable Products will be exhibiting at ALL4 PACK in conjunction with Actiwork, the company's distribution partners in France.

Fibrepack

Fibrepack is a manufacturer of custom-designed, moulded pulp packaging. The company uses Cure-In-The-Mould technology to produce high-quality, thin walled pulp products through a process known as thermoformed fibre or pulp thermoforming. All materials are locally sourced wood fibres benefiting from FSC chain-of-custody certification and Fibrepack's products are 100% recyclable and biodegradable. Fibrepack is part of the Plastique group, a European leader in thermoformed plastic packaging. As a result, Fibrepack benefits from the group's decades of experience.

Fletcher European

Fletcher European produces hygienically designed food-grade equipment for the food-manufacturing, catering and pharmaceuticals industries, to name a few. Fletcher European is a supplier that has, for many years, been recognised for the reliability and versatility of its solutions, thanks to its high-quality specialist equipment. The company has now launched its rotoX brand.

The rotoX brand of food-grade industrial equipment, exclusive to Fletcher European, spans a multitude of different categories, from inter-stacking containers and hygienic stacking boxes to ingredient dispensers and mobile container trucks. Fletcher European's technically advanced products bolster businesses' trust in their own equipment, ensuring that it is hygienic and easily cleaned, therefore perfect for food handling.

GEW

As a leading expert in UV curing technology, GEW has become a key player in the design and manufacture of UV systems for web printing and coating up to 2.50m wide. At ALL4 PACK 2018, GEW will showcase its enhanced set of high-power LED UV systems. The specialist company will feature its range of UV curing systems comprising mercury arc, LED and hybrid systems. The trade event will be a unique opportunity for the British manufacturer to update visitors on the various types of UV equipment that GEW offers.

Innovia Films

Innovia Films is an innovation-led, specialist producer of BOPP films. The company continuously researches new products and technologies that reduce food waste, enhance product shelf life, enable easy opening, and allow for the design of the final pack to be used within the circular economy.

At ALL4 PACK 2018, Innovia Films will showcase a range of new products with optimum barrier performance, including barrier-metallised films, ALOx clear high-barrier films, and coextruded EVOH oxygen barrier films. These films allow pack simplification. They achieve this by removing/replacing layers within lamination materials that restrict recycling, and by supporting the production of mono-layer materials for different applications, which facilitate easier recyclability.

Thermal Transfer Solutions

Thermal Transfer Solutions is Europe's leading thermal transfer ribbon converter, dedicated to helping its customers improve their businesses. The specialist company's Advantage Range of thermal transfer ribbons covers 95% of all applications for thermal transfer ribbons. Each ribbon grade is carefully selected, based on quality, reliability, value and its ability to cover a wide range of applications. Thermal Printer Support Ltd, the sister company, also supplies printers, printheads, spare parts and accessories. Together, the two companies are key partners for label businesses across

Europe.

Zepf Technologies UK

Zepf Technologies is a leading supplier of innovative container-handling solutions to the FMCG industry. Supplying some of the world's biggest consumer-goods companies, Zepf supports changeover improvement activity across a wide range of sectors including personal & home care, beverages, pharmaceuticals and chemicals.

Full list of British exhibitors at ALL4PACK Paris

Other UK-based exhibitors at ALL4PACK Paris 2018 will include Accraply, All-fill, Beardow & Adams, British Converting Solutions, BW Flexible Systems, Chart, CI Precision, Clarifoil (Celanese), Endoline Machinery Ltd, Enercon Industries, Go-Pak UK, NDC Technologies, Rexson, Stripfoil Deblistering Technology, and Thermofibre Ltd.

The full list of exhibitors is available [here](#).

More about ALL4PACK Paris:

ALL4PACK Paris, previously known as Emballage & Manutention, is the trade fair of reference for the packaging industry in all its aspects, including processing, printing and handling (logistics). In 2016, c.89,000 visitors attended the trade event, confirming its status as the premier platform for businesses in the sector, and as a forum for innovation and dialogue within the industry. The trade show has consistently attracted exhibitors from across the world, including the UK.

ALL4PACK Paris 2018 will be held at Paris Villepinte, in the Paris Region (France), between 26 and 29 November of this year.
