

Press release

BENNE SA is located in Castres, in south-west France, since 1919.

Thanks to the expertise of our engineers and technicians, and to the advanced technologies used, we adapt ourselves as close as possible to our customers' demand to bring complete solutions in conveying, conveyor belts, boilers, mechanics, 3D printing and robotics.

Since the creation of the company, we have create more than 7,000 different conveyors in all sectors of activity.

Our experience in the design, manufacturing and installation of conveying systems, makes BENNE SA as an essential partner, whatever your sector of activity: agribusiness, pharmaceutical, waste management, bottling, cardboard, wood, automobile, manufacturer ...

Today, the company, with its experience, is able to offer you solutions adapted to all your requests.

For the ALL4PACK exhibition, we are proud to present a conveyor specially designed for agro-industries, without retention point, stainless steel and 100% food!
It is quick disassembly conveyor belt (less than a minute to remove and put back his belt).

Come to discover it on our stand 6G 121!
