

EBERLE SAS is a French family run business and has been selling machinery all over the world for more than 35 years. The company is located close to Strasbourg and in Canada.

Our customers include paper core and edge-protector manufacturers, as well as core users (plastic and aluminum film converters, label and paper manufacturers,...).

We build the following equipment:

- High output production lines for quality spirally wound paper cores of a wide range of diameters.

- Off-line core cutters to cut paper as well as plastic cores.

- Complete production lines for various shapes of cardboard edge-protectors (V, U and flat profile).

We have recently developed a range of machines featuring automatic adjustments for easy and quick change-over. At the same time, we upgraded the productivity of our machines.

We will exhibit a multi-knives **Valériane Evolution**, an automatic in-line core cutter **Zenith 300**, and an automatic off-line core cutter **Vesna 2**.

Come and meet us on our booth **6D077**
