

STAND 6 L 081

TECMA ARIES expand its range of continuous overwrapping solutions with the ARIFORM 203.

The ARIFORM 203 is a simplified and optimized version of the previous models existing in TECMA ARIES range of machine.

This new machine matches lower speed of 90 packs/min. It keeps all the main characteristics of this type of machines (stainless steel framework, servo-driven version, etc...).

It allows the overwrapping of single cups, FFS cups, bottles or ready-made dishes and belongs to bottom gluing range.

Its main assets are accessibility, compactness, and low maintenance costs.
