

STAND 6 L 081

DreamOnCup® is a concept of «Shrink Sleeve» placing in-line for preformed and thermoformed cups.

DreamOnCup integrates the know-how of Sleever International in term of sleeve technology « Low Weight PET ®» as well as its positioning system associated Combisteam® which is part the new patented machine TecSleeve of Tecma Aries.

DreamOnCup® therefore proposes an innovative technology which permits to brands using injected or thermoformed cups to reinvent themselves by offering a new visual dynamic at the point of sale to consumers.

Nowadays this machine is designed for speeds up to 43,000 cups per hour.

Customer's benefits:

- Innovating and ecologically responsible packaging
- Improved « Time to Market »
- Optimized TCO
- Flexible and reconfigurable machine.
