

### **Press release - Kriska Industrie All4Pack 2018**

Kriska Industrie is specialised in feeding solutions. Our machines handle flat products such as sheets of paper, cardboards, folded boxes, flow-pack articles which are automatically ejected into a box or on a conveyor.

Our machines are designed and manufactured in France. We offer installation and maintenance of all our machines. We can adapt our solutions to our customer's technical requirements and line layout.

Our friction feeders can distribute 90gr/m<sup>2</sup> to 6mm thick products. They are equipped with a photocell that enables to run articles step by step or with a stop synchronized with the production line. They can be combined with printing and barcode checking systems.

Our solutions are adapted to biscuit & bread products manufacturers, ready-cooked dishes industry, pharmaceutical and cosmetic industry.
