

## PAKEA present ECOPAPERSTRAW

*Pakea presents its Paper Straw Line "ECOPAPERSTRAW", spiral winding line for very small tube diameters.*

It's everywhere, we consume billions of them. Plastic straws are directly linked to environmental pollution. It's becoming less and less popular for public opinion.

**PAKEA has the solution: ECOPAPERSTRAW.**

This line can reach, according to diameter and wall thickness, a production speed up to 60 meters of tubes per minute.

Paper straws are an ecological product, a product of tomorrow. Now is the time to position yourself in this developing market!

*About us :*

Designer and manufacturer of paper converting and packaging equipment, PAKEA is providing customized solutions for the production of paper tubes, paper profiles and composite canisters.

PAKEA is one of worldwide leading supplier of production lines for the paper and the food and non-food industries.
