

AMUT-COMI offers a wide range of **on-line and off-line thermoforming facilities**, characterized by their high speed, modular configuration, robustness and high efficiency for thermoforming different items used in multiple sectors.

The AMUT-COMI thermoforming machines are equipped with all the technological solutions required by **Industry 4.0** and can be networked with the "**Smart Factory**".

The ACF model machines are designed for thermoforming **trays, lids, containers and flowerpots** with integrated forming, drilling and cutting configurations.

These machines with high flexibility, have the characteristics to be controlled by **the HMI system "EASY"** developed by AMUT-COMI and benefit from advanced technologies for both small and large productions and allow the best performance of your molds.

We will be happy to meet you at the **INTAMAC 7C 242** booth at the ALL4PACK 2018.
